## ***Selena FM again recognized as one of best managed private companies in Poland***

**Selena Group's holding company has been awarded in the Best Managed Companies Poland program for another year in a row. This is the second edition of the Deloitte project, which recognizes excellence in privately held companies in Poland.**

The modern world has to cope with numerous challenges, including effects of the global pandemic, economic crisis and the difficult geopolitical situation. Running a business in such an environment requires strong competences to be able to reach the set goals and develop the organization further. It is for the second time that Selena FM has found itself among the companies recognized by experts of the advisory services firm Deloitte for the effectiveness and flexibility of its management team. Launched in 2022, Deloitte's Best Managed Companies Poland awards program evaluates companies in terms of such management areas as: strategy, innovation, corporate culture and financial performance.

*“Being recognized again in the Best Managed Companies program is of great importance for Selena Group. Especially today – when the world is facing huge challenges related to rapid changes – our place among the best managed private companies in Poland confirms that we are going in the right direction and are on track to deliver our business strategy. We’ve been present on the market for more than 30 years, and customers can buy our products, including Tytan Professional, COOL-R or Quilosa, in over 90 countries. We are very proud that today Selena Group has a stable market position and can flexibly and wisely adapt to current conditions. In our operations, we pay close attention to the needs of the market. It’s safe to say that Selena’s products responded to ESG goals even before this became fashionable. For many years now, they have contributed to reducing the carbon footprint in construction, helping their users do their work easier and faster. Our strategy focuses on supporting modern construction, modernization and thermal upgrades,”* says **Krzysztof Ościłowicz**, CFO of Selena Group.

Best Managed Companies is a marquee awards program established by Deloitte Private in Canada in 1993. It is currently held in several tens of countries. June 2023 saw the final phase of its second Polish edition. Its participating companies undergo a thorough verification process. Their competences, processes and strategy are scrutinized in relation to the best management practices used at private companies around the globe. In addition, participants take part in special management workshops and have the opportunity to exchange experiences with a wide group of business leaders.

Selena FM was again recognized in the Best Managed Companies Poland program. This is testament to the company's stable growth under strong management. In 2023, Selena FM was at the top of Polityka Insight's "National Champions" ranking, which looks at the importance of family businesses to the Polish economy. In turn, in 2022 Selena Group was awarded in the Polish Economy Crystal competition in the "Responsible Business" category, notably for its efforts to promote sustainable construction and mitigate climate change.

## Additional information:

### Selena Group

Selena Group is a global producer and distributor of construction chemicals and one of the four largest global producers of mounting foams for construction. For over 30 years, it has been successfully delivering innovative products that accelerate and facilitate work on construction sites in nearly 100 countries. Its foams, sealants, adhesives, waterproofing products, insulation systems, fastenings, and the complete energy roof system not only help in saving energy, water and time, but also substantially increase the energy efficiency of buildings. Selena Group has been actively working for sustainable construction. It participates in projects of the Polish Green Building Council (PLGBC) and the Polish ESG Association.

With its international experience gained in diverse markets, Selena Group can grow fast as an innovative company. The company has 30 companies in 19 countries and its own Research and Development Center, which coordinates the operations of local laboratories. Selena's manufacturing plants are located in Poland, Spain, Italy, Romania, Turkey, Kazakhstan, China and South Korea. Its high quality and innovative products are appreciated by the Group's partners and customers, who choose the Group's recognizable brands such as: Tytan Professional, Quilosa Professional, COOL-R or Matizol. In 2008, the shares of Selena FM S.A., the Group's holding entity, became admitted to trading on Warsaw Stock Exchange.
